PART 4 Questions 31-40

Questions 31-33

Choose the correct letter, A, B or C.

Ⓐ 31 What impact does Marc Prensky believe digital technology has had on young people?

A It has altered their thinking patterns. *evolving differently, processing information differently*

B It has harmed their physical development. *young people's brains may have physically changed, although no clear evidence exists.*

C It has limited their brain capacity.

Ⓑ 32 'Digital immigrants' tend to access computers

A using their native language.

B less efficiently than young people. *they aren't quite as effective at speaking the digital language as the natives are.*

C for less important information.

Ⓑ 33 What example is given of having a 'digital accent'?

A having less effective typing skills *prefer doing things as they've always done rather than typing sth into cp*

B doing things the old-fashioned way *1.for example, instead of using internet, finding phone numbers with a phone book or looking up information in an encyclopedia (百科全书) 2.rely on their original non-digital means of sourcing information*

C being unable to understand instructions *scanning a manual (使用手册) for a cp program, but the program itself will teach you how to use it.*

Questions 34-40

Which theorist makes each of the following points?

Write the correct letter, A, B or C, next to Questions 34-40.

unlike A, B….
C… A &B disagree

	Theorists	理论学家
A	Allen	*Thompson Allen*
B	James	*Samuel James*
C	Vander	*Peter Vander*

Points made

Ⓑ 34 Current teaching methods don't work. *agree that today's educators are no longer thriving in how they teach*

Ⓒ 35 Many students don't understand computers. *not necessarily proficient with technology*

Ⓐ 36 Computer technology doesn't interest all students. *some don't find the digital medium appealing*

Ⓑ 37 Students can still learn the traditional way. *younger students can communicate with digital immigrant teachers and still learn xx that were quite effective in the past*

Ⓐ 38 Students still need to learn research skills. *for example, carry out complex information searches, essential*

Ⓑ 39 We should use computer games to teach. *cp games can play an important role in classroom. for example*

Ⓒ 40 Computers can't replace educators. *teachers are always the leading part of the classroom, and no cp program comes close to doing what a human teacher does every day.*
