Test 1

LISTENING

PART 1 *Questions 1–10*

Complete the notes below.

*Write **ONE WORD AND/OR A NUMBER** for each answer.*

Listening test audio

Buckworth Conservation Group

Regular activities

Beach

keep the beach free of litter

- making sure the beach does not have **1** ....**litter**.... on it
- no **2** ....**dogs**.... *I'm afraid not, as they're banned from the beach itself*

自然保护区
Nature reserve

looking after the paths

- maintaining paths
- nesting boxes for birds installed *and next we're going to work on encouraging insects – they're important for the biodiversity of the reserve.*
- next task is taking action to attract **3** ....**insects**.... to the place
- identifying types of **4** ....**butterflies**.... *identify the different species of butterflies that visit the reserve.*
- building a new **5** ....**wall**.... *Another job we're doing at the reserve is replacing the wall on the southern side, between the parking area and our woodshed. It was badly damaged in a storm last month.*

Forthcoming events

Saturday

We'll be meeting in the car park at Dunsmore Beach at low tide – that's when the sands are dry enough for us to walk to the island without getting wet.

- meet at Dunsmore Beach car park
- walk across the sands and reach the **6** ....**island**....
- take a picnic
- wear appropriate **7** ....**boots**.... *boots are waterproof*

Woodwork session

Is it OK for beginners to take part?

- suitable for **8** ....**beginners**.... to participate in
- making **9** ....**spoons**.... out of wood *wooden spoons*
- 17th, from 10 a.m. to 3 p.m.
- cost of session (no camping): **10** £ ....**35**.... *There's a charge of £35, including lunch, or £40 if you want to camp in the wood.*

PART 3 *Questions 21–30*

Questions 21–26

*Choose the correct letter, **A**, **B** or **C**.*

Listening test audio

Work experience for veterinary science students

Ⓐ **21** What problem did both Diana and Tim have when arranging their work experience?

A making initial contact with suitable farms
B organising transport to and from the farm
C finding a placement for the required length of time
*n.*安置，实习工作

Ⓑ **22** Tim was pleased to be able to help

A a lamb that had a broken leg.
B a sheep that was having difficulty giving birth.
C a newly born lamb that was having trouble feeding.

Ⓑ **23** Diana says the sheep on her farm 文中他人观点不要混淆

A were of various different varieties.
B were mainly reared for their meat.
C had better quality wool than sheep on the hills.

The farm was in a valley and they had a lowland breed called Suffolks, although the farmer said they'd had other breeds in the past.
tim: So were they bred for their meat?
diana: Mostly, yes. They're quite big and solid.
tim: My farm was up in the hills and they had a different breed of sheep, they were Cheviots.
diana: Oh, I heard their wool's really sought after.
tim: Yes. It's very hard wearing and they use it for carpets.

Ⓐ **24** What did the students learn about adding supplements to chicken feed?

补充物，添加剂

A These should only be given if specially needed.
B It is worth paying extra for the most effective ones.
C The amount given at one time should be limited.

tim: I was interested in the amount of supplements they add to animals' feed nowadays. Like, even the chickens got extra vitamins and electrolytes in their feed. 维生素和电解质
diana: Yes, I found that too. And they're not cheap. But my farmer said some are overpriced for what they are.And he didn't give them as a matter of routine, just at times when the chickens seemed to particularly require them.
tim: Yes, mine said the same.He said certain breeds of chickens might need more supplements than the others, but the cheap and expensive ones are all basically the same.
diana: Mm

Ⓒ **25** What happened when Diana was working with dairy cows?

A She identified some cows incorrectly.
B She accidentally threw some milk away.
antibiotic **C** She made a mistake when storing milk.

Ⓒ **26** What did both farmers mention about vets and farming?

A Vets are failing to cope with some aspects of animal health.
B There needs to be a fundamental change in the training of vets.
C Some jobs could be done by the farmer rather than by a vet.

tim: I asked my farmer how much he depended on the vet to deal with health problems.
I'd read reports that the livestock's health is being affected as farmers are under pressure to increase production.
农民面临增产的压力，牲畜健康受影响
Well, he didn't agree with that, but he said that actually some of the stuff the vets do, like minor operations, he'd be quite capable of doing himself.
diana: Yeah. My farmer said the same. But he reckons vets' skills are still needed.

Questions 27–30

What opinion do the students give about each of the following modules on their veterinary science course?

*Choose **FOUR** answers from the box and write the correct letter, **A–F**, next to questions 27–30.*

Opinions

A Tim found this easier than expected. ***straightforward***

B Tim thought this was not very clearly organised.

C Diana may do some further study on this.

D They both found the reading required for this was difficult.

E Tim was shocked at something he learned on this module.

F They were both surprised how little is known about some aspects of this.

组件，单元，模块
Modules on Veterinary Science course

Ⓐ **27** Medical terminology .....

Ⓔ **28** Diet and nutrition .....

Ⓕ **29** Animal disease .....

Ⓒ **30** Wildlife medication *n.* 药物，药品；药物治疗.....

Diana: Now we've got to give a bit of feedback about last term's modules – just short comments, apparently.
Shall we do that now?
Tim: OK. So medical terminology.
Diana: Well, my heart sank when I saw that, especially right at the beginning of the course. And I did struggle with it.
Tim: I'd thought it'd be hard, but actually I found it all quite straightforward.

What did you think about diet and nutrition?
diana: OK, I suppose.
Tim: Do you remember what they told us about pet food and the fact that there's such limited checking into whether or not it's contaminated?
I mean in comparison with the checks on food for humans – I thought that was terrible.

*Diana: Mm. I think the module that really impressed me was the animal disease one, when we looked at domesticated animals in different parts of the world, like camels (*骆驼 *)and water buffalo(*水牛*) and alpaca(*羊驼*).*
The economies of so many countries depend on these, but scientists don't know much about the diseases that affect them.
*Tim: Yes, I thought they'd know a lot about ways of controlling and eradicating(*根除*) those diseases, but that's not the case at all.*

I loved the wildlife medication unit. Things like helping birds that have been caught in oil spills. (n. v. 洒出，溢出*)*
That's something I hadn't thought about before.
*Diana: Yeah, I thought I might write my dissertation(*专题论文*) on something connected with that.*
Tim: Right. So …
