

The training we get is a continuous process, focusing on technical competence(能力) and safe handling techniques, and it's given me the confidence to deal with extreme situations without panicking. (E)
 I was glad I'd done a first aid course before I started, as that's a big help with the casualty care activities we do. (D)
 We've done a lot on how to deal with ropes and tie knots –that's an essential skill. (B)
 After a year, I did a one-week residential course, led by specialists. (A)
 They had a wave-tank where they could create extreme weather conditions – so we could get experience at what to do if the boat turned over in a storm at night, for example. (C)

Questions 17 and 18

Choose **TWO** letters, **A–E**.

细分具体项目, 评价(重点)

③ ⑤ Which **TWO** things does David say about the lifeboat volunteer training?

- A The residential course developed his leadership skills. led by specialist 跟他的领导能力无关
- B The training in use of ropes and knots was quite brief. an essential skill 必备技能 没说brief
- C The training exercises have built up his mental strength. confidence without panicking
- D The casualty care activities were particularly challenging for him. first aid before, 有帮助, 不难
- E The wave tank activities provided practice in survival techniques. extreme weather conditions, what to do

casualty
伤亡人员,急救室
first aid

Questions 19 and 20

Choose **TWO** letters, **A–E**.

最激励人心的, 最有动力的

① ② Which **TWO** things does David find most motivating about the work he does?

- A working as part of a team help others, group, family
- B experiences when working in winter colder month, most rewarding
- C being thanked by those he has helped
- D the fact that it keeps him fit 健壮的
- E the chance to develop new equipment 开发新设备的机会 facility / tools
原文: learned technology 学到了很多技术

Since I started, I've had to deal with a range of emergency situations. But the work's hugely motivating. It's not just about saving lives – I've learned a lot about the technology involved. My background in IT's been useful here, and I can use my expertise(专长, 专门技能) to help other volunteers. They're a great group – we're like a family really, which helps when you're dragging yourself out of bed on a cold stormy night. But actually, it's the colder months that can be the most rewarding time. That's when the incidents tend to be more serious, and you realise that you can make a huge difference to the outcome. So if any of you listeners are interested. . .

PART 3 Questions 21–30

Questions 21–24

Choose the correct letter, A, B or C.

- ① 21 At first, Don thought the topic of recycling footwear might be too
 A limited in scope. *perhaps there isn't enough to say about it, recycling bins, they go to charity shops and that's about it.*
 B hard to research. *范围有限*
 C boring for listeners. *although it's quite interesting*
- ② 22 When discussing trainers, Bella and Don disagree about
 A how popular they are among young people. *运动鞋 <美>sneaker agree 休闲的,随便的*
 B how suitable they are for school. *男: hard-wearing, a bit casual for school uniform? I don't think they're right.*
 C how quickly they wear out. *女: Actually, I think some of them look quite smart (精神) on pupils, better than a scruffy (adj. 破旧的,肮脏的,不整齐的) old pair of shoes.*
 磨损, 用坏
- ③ 23 Bella says that she sometimes recycles shoes because
 A they no longer fit. *that haven't gone out of fashion and still fit,*
 B she no longer likes them. *just because they don't look great on me any more.*
 C they are no longer in fashion.
- ④ 24 What did the article say that confused Don? *男: recent sales of footwear have increased enormously.*
女: That didn't surprise me
 A Public consumption of footwear has risen.
 B Less footwear is recycled now than in the past. → *But then it said that the amount of recycled footwear has fallen, 6% now, previous 11%,*
 C People dispose of more footwear than they used to. *That doesn't seem to make sense.*
 处理, 处置

Hi Don – did you get the copy of the article on recycling footwear that I emailed you?

Yeah – it's here . . . I've had a look at it.

So do you think it's a good topic for our presentation?

Well, before I started reading it, I thought recycling footwear, well, although it's quite interesting, perhaps there isn't enough to say about it, cos we put shoes in recycling bins, they go to charity shops and that's about it.

But there's much more to it than that.

I realise that now and I'm keen to research the topic more.

That's great.

One of the things I didn't realise until I read the article was just how many pairs of trainers get recycled!

Well, a lot of young people wear them all the time now. They've become more popular than ordinary shoes.

I know. I guess they are very hard-wearing, but don't they look a bit casual for school uniform? I don't think they're right for that.

Actually, I think some of them look quite smart on pupils . . . better than a scruffy old pair of shoes.

So do you keep shoes a long time?

Yes. Though I do tend to wear my old pairs for doing dirty jobs like cleaning my bike.

I must admit, I've recycled some perfectly good shoes, that haven't gone out of fashion and still fit, just because they don't look great on me any more. That's awful isn't it?

I think it's common because there's so much choice. The article did say that recent sales of footwear have increased enormously.

That didn't surprise me.

No. But then it said that the amount of recycled footwear has fallen: it's 6% now compared to a previous level of 11%, That doesn't seem to make sense.

That's because not everything goes through the recycling process. Some footwear just isn't good enough to re-sell, for one reason or another, and gets rejected.

Test 2

Questions 25–28

What reasons did the recycling manager give for rejecting footwear, according to the students?

Choose **FOUR** answers from the box and write the correct letter, **A–F**, next to Questions 25–28.

suede / swerd /
n. 绒面革, 动物皮反面带绒毛
beige n. adj. 米色
stain n. v. 玷污, 着色, 弄脏

worn
adj. 用坏的, 用旧的
wear 的过去分词

sole
adj. 唯一的
n. 脚底, 鞋底

Reasons

- | | | |
|----------|---------------------------------------|-------------------------|
| A | one shoe was missing | lost, can't find |
| B | the colour of one shoe had faded | light, different |
| C | one shoe had a hole in it | broken |
| D | the shoes were brand new | |
| E | the shoes were too dirty | stained, mud |
| F | the stitching on the shoes was broken | split 裂开 |
- 缝合: 针脚
stitch n.v. 缝, 缝补

darken / lighten
使变暗、变深 / 使变亮、变浅

deep / shallow
物理深度和思想深度

Footwear

- ⑤ 25** the high-heeled shoes *expensive – the material was suede and they were beige in colour, it looked like someone had only worn them once, but in a very wet field so the heels were too stained with mud and grass to re-sell them.*
- ⑤ 26** the ankle boots *Apparently, the heels were worn – but that wasn't the problem. One of the shoes was a much lighter shade than the other, one... it had obviously been left in the sun.*
- ⑤ 27** the baby shoes *Oh yes – we're told to tie shoes together when we put them in a recycling bin, but people often don't bother. You'd think it would have been easy to find the other, but it wasn't. That was a shame because they were obviously new.*
- ⑤ 28** the trainers *He said they looked like they'd been worn by a marathon runner. Yeah – weren't they split? Not exactly. One of the soles was so worn under the foot that you could put your finger through it.*

Questions 29–30

germ (germs) 脏, 传染病菌
bacteria(bacterium) 好坏都有
virus 病毒 viruses
fungus 真菌 fungi

identical
adj. 完全相同的

Choose the correct letter, **A, B** or **C**.

- ⑤ 29** Why did the project to make 'new' shoes out of old shoes fail? *人们不是因为这个原因拒绝*
- A** People believed the 'new' pairs of shoes were unhygienic. *wasn't surprised that it failed, germs you could catch*
- B** There were not enough good parts to use in the old shoes. *It sounded like a good idea. They get so many shoes, they should be able to match parts.*
- C** The shoes in the 'new' pairs were not completely alike.
- ⑤ 30** Bella and Don agree that they can present their topic *Well, people didn't refuse them for that reason, did they? It was because the pairs of shoes weren't identical. They still managed to ship them overseas, though. That's another area we need to discuss.*
- A** from a new angle. *a very different approach 思路, 途径 perspective / viewpoint / think differently*
- B** with relevant images. *bigger picture*
- C** in a straightforward way. *simple / easy*

You know I used to consider this topic just from my own perspective, by thinking about my own recycling behaviour without looking at the bigger picture. (宏观视角)
So much happens once shoes leave the recycling area.
It's not as simple as you first think, and we can show that by taking a very different approach to it.
Absolutely. So let's discuss . . .
